Le Cong Thanh

Web Developer

0392333687 congthanhle225@gmail.com github.com/congthanhle Ho Chi Minh City

OBJECTIVE

Passionate Frontend Developer with over two years of experience in building scalable web applications and mini apps. Strong in leveraging AI agents to automate workflows, accelerate development, and enhance productivity. Seeking opportunities to specialize in modern frontend frameworks (Vue, React, Nuxt) while delivering high-performance, user-centric products with seamless UI/UX.

EDUCATION

UNIVERSITY OF INFORMATIONTECHNOLOGY VNU-HCM 09/2020 - 11/2024

Major: Information system

GPA: 8.15/10

WORK EXPERIENCE

GMO-Z.com Runsystem - Outsource project: Local Government Information systems 09/2023 - 11/2024

Position: Frontend Developer

- Worked on a government administrative management system for Japan, focusing on digitizing workflows and improving operational efficiency.
- Operated within an Agile/Scrum framework to ensure progress and quality across development sprints.
- Analyzed business requirements and contributed to core technical design.
- Developed new features and user interfaces; collected and integrated user feedback to enhance performance and user experience across multiple codebases.

Tech: Reactjs, Typescript, Mocha, Chai, Sinon.

Smartgift Solution - Product project 11/2024 - now

Position: Frontend Developer

1. Admin Console & Corporate Website Development

- Collaborated closely with the Backend team to develop and maintain Admin Consoles, including:
  - Customer Loyalty Management System for **TH Loyalty**
  - Administration portals for multiple Zalo Mini App projects
- Developed and maintained Corporate Websites such as:
  - MVVA
  - Smartgift.vn
- Primarily worked on a module-based architecture, taking ownership of specific features including dashboard management, data tables, form handling, role-based access control, and system configuration.
- Focused on building scalable, reusable UI components and ensuring consistency across systems.

Tech stack: Reactjs, Tailwind CSS, Ant Design, Laravel, Vuejs.

2. Zalo Mini App Development (End-to-End Frontend Ownership)

- Took full ownership of Frontend development for multiple Zalo Mini Apps, handling UI/UX implementation, state management, API integration, performance optimization, and deployment.
- Notable projects include:
  - Sắm Tết tại TH true mart – Nhận hơn 54,000 quà
  - BVND Gia Định – Conference Progress Tracking
  - TriThucViet
  - SmartEdu
  - Trường Đại học Việt Nhật ĐHQGHN

- Trung tâm tư vấn tuyển sinh NTTU

- Built Mini Apps for various domains including e-commerce, hospital conference tracking, education, surveys, and ticket booking.
- Ensured responsive design, optimized performance within Zalo Mini App constraints, and maintained clean, maintainable code structure.

Tech stack: Reactjs, Recoil, Zustand, TanStack Query, Tailwind CSS, Ant Design,...

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, Vuejs, Reactjs, Redux, Zustand, Tailwind, Ant Design. HARD SKILL

Backend: Laravel, MySQL.

AI-assisted development, AI Agent: ChatGPT, Claude, Antigravity

Leveraged AI to automate repetitive tasks, significantly reducing development time.

Developed a complete web application by integrating multiple AI models with clear business logic.

Strong self-learning, research, and problem-solving ability. SOFT SKILL

Effective communication and teamwork skills.

Good time management and task prioritization.
